

Scalable Automation by MiraMotion

Smart. Modular. Built to Grow.

From prototype to mass production, **MiraMotion** helps U.S. manufacturers automate the right way — with scalable, high-impact systems that grow alongside your demand.

Manual Assembly **MiraBench Series**

Low-cost, operator-driven workstations

- Ideal for 5,000–50,000 units/year
- ~25s cycle times, minimal footprint, no power required
- Add test jigs and ergonomic fixtures for consistent output
- **Starting from ~\$17k USD**

Perfect for startups, pilot production,
or fast-turn customization.

Semi-Automated Assembly

MiraCell & HybridLine

Boost throughput without losing flexibility

- Add cobots, screwdrivers, conveyors, or inspection tools
- One operator can run multiple cells
- Modular investment: scale when you're ready
- Cycle times: 10-20s
- **Entry from ~\$16k | Line setups from ~\$55k**

For teams scaling to 100k-1M units/year
with minimal extra headcount.

Fully Automated Assembly

AutoFlow Lines

Full-speed, lights-out production — 24/7

- Handles feeding, assembly, QC, marking, and packaging
- One operator can run the entire line
- **Cycle times as fast as 3s per part**
- **Investment starts around \$220k**

ROI via labor & unit cost savings

Best for mature products, high volumes,
and repeatable processes.

Built-In Quality & Add-Ons

- Vision checks
- Inline measurement
- Laser & label marking
- Automated testing & packaging
- Traceability from start to ship

Every **MiraMotion** system is designed to “build it right the first time” — no costly manual rechecks required.

Let's Talk

Not sure where to start? We'll map out a solution that fits your volume, process, and ROI goals.
